

Type of license holder	How to count each license holder
(8) A person who has a license that allows the license holder only to trap animals or only to engage in commercial fishing or other commercial activities.	Cannot be counted.

§ 80.34 How does an agency calculate net revenue from a license?

The State fish and wildlife agency must calculate net revenue from a license by subtracting the per-license costs of issuing the license from the revenue generated by the license. Examples of costs of issuing licenses are vendors' fees, automated license-system costs, licensing-unit personnel costs, and the costs of printing and distribution.

§ 80.35 What additional requirements apply to multiyear licenses?

The following additional requirements apply to multiyear licenses:

(a) A multiyear license may be valid for either a specific or indeterminate number of years, but it must be valid for at least 2 years.

(b) The agency must receive net revenue from a multiyear license that is in close approximation to the net revenue received for a single-year license providing similar privileges:

(1) Each year during the license period; or

(2) At the time of sale as if it were a single-payment annuity, which is an investment of the license fee that results in the agency receiving at least the minimum required net revenue for each year of the license period.

(c) An agency may spend a multiyear license fee as soon as the agency receives it as long as the fee provides the minimum required net revenue for the license period.

(d) The agency must count only the licenses that meet the minimum required net revenue for the license period based on:

(1) The duration of the license in the case of a multiyear license with a specified ending date; or

(2) Whether the license holder remains alive.

(e) The agency must obtain the Director's approval of its proposed technique to decide how many multiyear-license holders remain alive in the cer-

tification period. Some examples of techniques are statistical sampling, life-expectancy tables, and mortality tables.

§ 80.36 May an agency count license holders in the annual certification if the agency receives funds from the State to cover their license fees?

If a State fish and wildlife agency receives funds from the State to cover fees for some license holders, the agency may count those license holders in the annual certification only under the following conditions:

(a) The State funds to cover license fees must come from a source other than hunting- and fishing-license revenue.

(b) The State must identify funds to cover license fees separately from other funds provided to the agency.

(c) The agency must receive at least the average amount of State-provided discretionary funds that it received for the administration of the State's fish and wildlife agency during the State's five previous fiscal years.

(1) State-provided discretionary funds are those from the State's general fund that the State may increase or decrease if it chooses to do so.

(2) Some State-provided funds are from special taxes, trust funds, gifts, bequests, or other sources specifically dedicated to the support of the State fish and wildlife agency. These funds typically fluctuate annually due to interest rates, sales, or other factors. They are not discretionary funds for purposes of this part as long as the State does not take any action to reduce the amount available to its fish and wildlife agency.

(d) The agency must receive State funds that are at least equal to the fees charged for the single-year license providing similar privileges. If the State does not have a single-year license providing similar privileges, the Director must approve the fee paid by the State for those license holders.

§ 80.37

(e) The agency must receive and account for the State funds as license revenue.

(f) The agency must issue licenses in the license holder's name or by using a unique identifier that is traceable to the license holder, who must be verifiable in State records.

(g) The license fees must meet all other requirements of 50 CFR 80.

§ 80.37 What must an agency do if it becomes aware of errors in its certified license data?

A State fish and wildlife agency must submit revised certified data on paid license holders within 90 days after it becomes aware of errors in its certified data. The State may become ineligible to participate in the benefits of the relevant Act if it becomes aware of errors in its certified data and does not resubmit accurate certified data within 90 days.

§ 80.38 May the Service recalculate an apportionment if an agency submits revised data?

The Service may recalculate an apportionment of funds based on revised certified license data under the following conditions:

(a) If the Service receives revised certified data for a pending apportionment before the Director approves the final apportionment, the Service may recalculate the pending apportionment.

(b) If the Service receives revised certified data for an apportionment after the Director has approved the final version of that apportionment, the Service may recalculate the final apportionment only if it would not reduce funds to other State fish and wildlife agencies.

§ 80.39 May the Director correct a Service error in apportioning funds?

Yes. The Director may correct any error that the Service makes in apportioning funds.

50 CFR Ch. I (10–1–15 Edition)

Subpart E—Eligible Activities

§ 80.50 What activities are eligible for funding under the Pittman-Robertson Wildlife Restoration Act?

The following activities are eligible for funding under the Pittman-Robertson Wildlife Restoration Act:

(a) *Wildlife Restoration program.* (1) Restore and manage wildlife for the benefit of the public.

(2) Conduct research on the problems of managing wildlife and its habitat if necessary to administer wildlife resources efficiently.

(3) Obtain data to guide and direct the regulation of hunting.

(4) Acquire real property suitable or capable of being made suitable for:

(i) Wildlife habitat; or

(ii) Public access for hunting or other wildlife-oriented recreation.

(5) Restore, rehabilitate, improve, or manage areas of lands or waters as wildlife habitat.

(6) Build structures or acquire equipment, goods, and services to:

(i) Restore, rehabilitate, or improve lands or waters as wildlife habitat; or

(ii) Provide public access for hunting or other wildlife-oriented recreation.

(7) Operate or maintain:

(i) Projects that the State fish and wildlife agency completed under the Pittman-Robertson Wildlife Restoration Act; or

(ii) Facilities that the agency acquired or constructed with funds other than those authorized under the Pittman-Robertson Wildlife Restoration Act if these facilities are necessary to carry out activities authorized by the Pittman-Robertson Wildlife Restoration Act.

(8) Coordinate grants in the Wildlife Restoration program and related programs and subprograms.

(b) *Wildlife Restoration—Basic Hunter Education and Safety subprogram.* (1) Teach the skills, knowledge, and attitudes necessary to be a responsible hunter.

(2) Construct, operate, or maintain firearm and archery ranges for public use.

(c) *Enhanced Hunter Education and Safety program.* (1) Enhance programs for hunter education, hunter development, and firearm and archery safety.
